**National Register of Historic Places Evaluation:****43. Statement of Significance:**

This bridge was previously determined eligible for the National Register under Criterion C as part of the Oklahoma Historic Bridge Survey Spans of Time and was reevaluated to identify if additional areas of significance apply. This bridge has significance under Criterion A for its association with important trends or events that have made a significant contribution to the broad patterns of Oklahoma history. Documentary evidence supports that its significance is demonstrated through its association with early Oklahoma Highway Department (OHD) and federal aid programs, reflecting early state and federal initiatives in road and bridge construction. Built in 1920, this was one of three steel and concrete bridges in LeFlore County constructed as Federal Aid Project No. 10. Research did not reveal potential significance for this property under Criterion B: Significant Person or Criterion D: Information Potential.

**44. Integrity:**

This bridge has some deterioration, but is still able to demonstrate its significance. This bridge retains integrity.

**45. Recommendation:**

Eligible.
